

On the app startup, the user enters values to each edit text from left to right. (date, amount, purpose) into the top text boxes with the grey text hints. The user is the primary actor using this system. The system contains four text boxes and two buttons. The Add button will add the amount to the current balance and the transaction text view. While the subtract button will subtract the amount from the current balance and add the transaction to the transaction text box The goal is to have all the deposits and transactions in a clear list with the balance easily displayed. This data is also saved with shared preferences.

Current balance

Date	Amount	Purpose	+	-
------	--------	---------	---	---
